

SANZI

公司简介
Company profile

叁卉模型制作有限公司成立于2002年，主要从事研发及经营动漫美少女、仿真人物、实体娃娃等业务。其中，主打的实体娃娃是由金属骨架+高级食品硅胶材料两部分组成；娃娃皮肤仿拟少女水嫩肌肤般触感，可做出各种真人的形体动作，五官精致，明眸流盼，形体婀娜。我们拥有一支由中日雕塑大师、化妆师和机械工程师所组成的精英团队，以精湛的技术和优质的服务质量，赢得国内以及欧美和日本客户的一致好评。我们的团队将秉承“朝气蓬勃，锲而不舍，精益求精”的创业精神并发扬到底，力争为满足爱好者的需求和追求，创造更出色、更唯美的产品，诚与新老客户携手共创辉煌！

中国公司：广西南宁市星光大道213号
香港办事处：新界大埔南华蒲村9A号

Our company has been established since 2002 which located in Shenzhen, China and branch in HongKong. In 2013, our company moved to Guangxi with establishing large size of factory. We are mainly producing not only girl of anime but also realistic girl figure using material of PVC and resin. For the past few years we are focusing on developing the realistic silicon girl figure. We use high quality of silicon with hard skeleton which the doll become more realistic and more pose you can make. With technical supporting by our Japanese sculptor our products become famous in worldwide. In the nearly future we are continuing to seek the improvement and development of our products.

公司证件>>>>>>

以优质的产品赢得客户，以良好的服务赢得市场。经过多年的发展，“叁卉模型制作有限公司”始终秉承质量是企业的核心，我们凭借科学的质量管理体系及扎实的技术，使“叁卉”产品一直走在行业的最前端。

To hing-quality products to win customers, win the market good service. After years of development, "SANHUI" always adhering to the quality is the core of the enterprise, We rely on the scientific quality management system and strong technical, the front of the "SANHUI" products have been walking in the industry.

Sanhui Dolls Manual

Dear Customer,

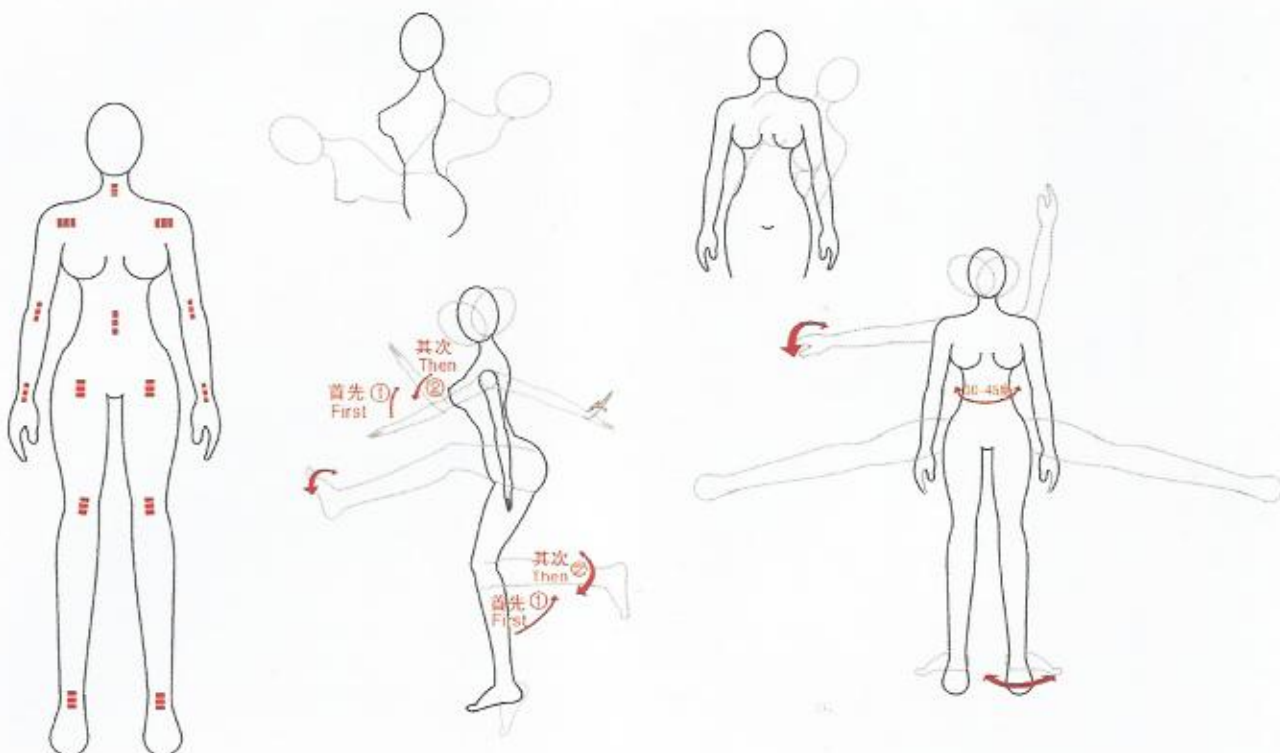

Thank you for purchasing a Sanhui doll!

Prior to manipulating the doll model, please spare time to read through the manual with the following instructional tips:

Tips:

1. Range of motions. Sanhui dolls are designed with a flexible skeleton of stainless steel in a wide range of motions. But DO NOT force moves or poses. Joints are comparatively tight at the beginning but will become smooth after a period of proper operating. Incorrect operation may cause loose joints or joint dislocation. Repetition of the same operating courses or frequent changes of actions are NOT recommended—intervals should be allowed between moves. Operating range is shown in the diagram below.
2. Precaution. Avoid the following situations prone to damage: prone position on breasts; excessive time for standing position; moves of joints in wrong directions or beyond limit; excessive forces in squeezes, pinches or bends; sharp edges and objects etc.
3. Temporary standing position. Soft feet with delicate patterns of Sanhui dolls allow temporary stand only. Also, appropriate steps should be followed—
 - a) make sure the ground to be both flat and soft, and the bottom of feet to fully land the ground; otherwise, foot damage or puncture may occur; and
 - b) ensure that reasonable gravity for dolls to stand, or prop; loss of gravity may cause irreparable damage from falling.
4. Adequate lubrication. Sanhui dolls are made of Platinum silicone—soft (*Silica Shore 0 degree and below*) and strong in anti-tear properties (*450% elongation, anti-tear strength at 5.4Mpa*). Adequate lubrication is highly recommended at using the integrated orifice system (1 to 3 orifices in corresponding model type). Still, excessive forces prone to tearing and irreparable damage. Also, talc the doll prior to dressing.
5. Cleaning and talc. Shower to bathe the doll prior to the first time of use. Sanhui dolls are of waterproof designs all over the body, including the part of neck-bolt. Still, try to avoid tub bath; any possible leakage may cause corrosion or odor from inside the body. Talc the doll immediately after drying with soft towel for sustaining good conditions of silicone.
6. Storage. Ideal storage condition at temperature is between 5-35 degree Celsius. Avoid direct sunlight. Store the doll away from dyed leather or dyed fabrics. Do NOT place heavy objects on the doll, or squeeze it on tight dress. Release forces within joints to avoid long-term bend prone to irretrievable silica folds or cracking.
7. Accessories Installation. A) head: mount it on the neck-bolt screw and turn clockwise usually in 3-4 laps to tighten. B) wigs: after mounting the head, set the wig from the back of the head first, then tighten the remaining from inner rim.

[Range of Motion]

REMINDERS:

1. If used properly, it is likely for Sanhui silicone dolls to sustain for more than 10 years and above, provided no cracking or tearing in the silica gel or dislocation of joints. In case of tearing, immediately stop using and pose the doll from further tearing—better close up the breakage opening.
2. Please contact customer service for further instructions or if you have any question.

★ ADULTS ONLY PLEASE!
